

2nd Dynasty – Non-Commercial Printing License

Any item bought, either through Kickstarter, or on sites such as MyMiniFactory and Drivethrurpg, comes with an exclusive, non-transferable, non-commercial printing license.

With this kind of license,

You **MAY**:

- Print any 2nd Dynasty STL file you own on a home 3D printer in unlimited quantities for personal use
- Order any part you own printed through a third-party 3D print service in unlimited quantities for personal use

You **MAY NOT**:

- Sell the STL files
- Sell physical prints for a profit
- Redistribute the STL files
- Modify the files without express written permission

If you want to do any of the above in the You MAY NOT section, you want to extend your license to a commercial license.

Commercial Licensing

Commercial licenses are an extended version of the non-commercial printing licenses standard with a purchase of 2nd Dynasty STL files that allow limited for-profit printing and distribution.

We now offer a Patreon service that allows interested parties in extending their non-commercial license to a limited commercial license.

For more information on becoming a licensee, visit <https://www.patreon.com/2nddynasty>
